Specializations and expert programs product benefits

As part of the Solutions Partner benefits, if you have earned a specialization, you will receive incremental product benefits to help further accelerate your business. Incremental benefits for specialization and expert programs are only available with Solutions Partner benefits and can not be added to legacy benefits.

Each category of the specializations and expert programs (Azure, Business Applications, Modern Work and Security) has individual maximum cap amounts for benefits provisioning: the number of specializations or expert programs in that category which will be eligible for incremental product benefits. Refer to the table of [specializations and expert programs benefits categories](#) at the end of this section for the classification. The max cap amounts are outlined in the following tables. Details are subject to change.

Specialization and expert program benefits will be provided at the time of purchasing Solutions Partner benefits, or at the time of attainment through the remainder of the Solutions Partner membership year for additional specializations and expert programs attained (within the respective max cap amounts). Refer to the illustrative example for more details.

Azure specialization and expert program product benefits

Illustrative example

Review this illustrative example to better understand how the benefits are provided to Solutions Partners for their Solutions Partner designation(s) and specialization(s) or expert program(s). In this example, 'benefits' refers to the items listed in this document and excludes other provisions such as badging. Details are subject to change.

This example follows the fictional company 'Contoso', that has attained a legacy gold competency with a single Azure specialization, whose annual legacy competency anniversary date is January 1.

Date	Contoso action	Benefits provided
Oct 2022	Contoso meets the requirements for, and attains, the Solutions Partner for Infrastructure (Azure) designation.	No change. Contoso continues to receive and be able to activate their legacy gold competency benefits until their next anniversary date (Jan 1, 2023).
Dec 2022	Contoso earns an additional Azure specialization (total of two).	No change (incremental benefits for specialization are only available with Solutions Partner benefits).
Jan 2023	At renewal, Contoso meets the requirements for the Solutions Partner for Infrastructure (Azure) designation, selects the benefits for Solutions Partners and pays the aligned fee.	Contoso is provided the common benefits, the Infrastructure (Azure) product benefits, and two sets of the Azure specialization product benefits (assuming continued enrolment and eligibility of both specializations).
Feb 2023	Contoso meets the requirements for, and attains, the Solutions Partner for Data & AI (Azure) designation.	Contoso is provided the incremental Data & AI (Azure) product benefits (i.e., Azure credits, Visual Studio subscriptions), with an expiry date of Contoso's next membership anniversary date (Jan 1, 2024).
Mar 2023	Contoso meets the requirements for, and is awarded, four additional Azure specializations (total of six).	Contoso is provided three additional incremental sets of the Azure specialization product benefits (considering the max cap of five Azure specialization benefits) with an expiry date of Contoso's next membership anniversary date (Jan 1, 2024).

Change log

The following is a summary of the latest updates made to the Microsoft AI Cloud Partner Program Benefits Guide

Please note that program information herein is subject to change and should not be interpreted as an offer, endorsement, guarantee, commitment or any other type of representation on the part of Microsoft. Be sure to review the benefits information in Partner Center before paying the annual fee.

Date	Update number and title	Details
August 2022	1) GTM Toolbox points	While the GTM Toolbox – used to create co-branded assets – will remain active, the 18 points for editorial review of the assets will no longer be offered.
	<i>[Removed from tables as of June 2023]</i> 2) Azure dev/test sponsorship and credits	The planned launch of an Azure dev/test bulk sponsorship has been delayed until further notice. In the interim, dev/test credits will be re-introduced to the Visual Studio Enterprise subscriptions. The features of these Visual Studio Enterprise subscriptions will be the same as those offered as benefits for silver and gold competencies.
	3) Windows 11 IoT	Product keys are only provided for software available via volume licensing. Currently Windows 11 IoT is not available in market via volume licensing.
	4) GitHub Enterprise Cloud subscriptions for the DevOps with GitHub on Microsoft Azure specialization	GitHub Enterprise Cloud subscriptions for the DevOps with GitHub on Microsoft Azure specialization will not be available until further notice.
December 2022	5) Updates to language for clarity	A) Updated the name of System Center Configuration Manager Suite to Microsoft Endpoint Configuration Manager. B) Updated the introduction of the Specialization section.
