- In 3.1 a new optional new Deployment Approach for Azure Landing Zones, the Full Azure Landing Zone Conceptual Architecture, has been added for partners to demonstrate in deployment approaches
- Bicep has been added to use a resource when providing evidence for control 3.1 in customer environments

Microsoft Partner Network

### **Program overview**

Showcase your organization's validated capabilities in deploying a hyper-converged infrastructure on premises with connectivity to Microsoft Azure Cloud. The world of IT is undergoing constant change. To stay competitive, your customers need to keep up with the ever-growing complexity and relentless pace of innovation. Help them get ahead and stay there with a Hybrid Cloud Infrastructure with Microsoft Azure Stack HCI advanced specialization.

This specialization allows partners with an active <u>Gold Cloud Platform Competency</u> to further differentiate their organizations, demonstrate their capabilities, and build stronger connections with customers.

Partners who earn an advanced specialization will get a customer-facing label displayed on their business profile page and are prioritized in customer searches in the <u>Microsoft AppSource Partner Gallery</u>, <u>Learn more about advanced specializations</u>.

#### What are the requirements?

Eligible partners must meet the highest standards for service delivery and support. All requirements will be verified by Microsoft and/or a third-party vendor, either automatically or by manual review, and are subject to change.

| Requirements | Details   |
|--------------|---|
| Competency   | Your company must have an active Gold Cloud Platform competency.  |
| Performance  | USD \$500 monthly average ACR from Azure Stack HCI, from the last three (3) months, from at least two (2) customers. ACR can be achieved through <a href="Digital Partner of Record">Digital Partner of Record</a> , <a href="Partner Admin Link">Partner Admin Link</a> , and Cloud Solution Provider. <a href="Government Subscriptions">Government Subscriptions (i.e. Fairfax) are not eligible for ACR via PAL association</a> <a href="Learn more about Azure ACR">Learn more about Azure ACR</a> (Service Level 2 = Azure Stack HCI) |
| Knowledge    | Your company must have at least three (3) FTEs pass the following technical assessments.  • Azure Administrator Associate  • Azure Solutions Architect Expert  • Azure DevOps Engineer  |
| Audit        | Your company must pass a third-party remote audit. View audit checklist.  |

## How do I apply?

Only administrators of an organization's Microsoft partner account can submit an application for the Hybrid Cloud Infrastructure with Microsoft Azure Stack HCI advanced specialization on behalf of the organization. If you have the appropriate role and access, you can apply by signing into Partner Center and navigating to your <u>Partner Center Dashboard</u> > Competencies > Advanced Specialization.
