

How to build a secure, productive hybrid workplace

Organizations and IT teams face new challenges in today's hybrid workplace

Employees need the right technology to work remotely.

Connecting and collaborating are difficult when everyone is dispersed.

Managing devices and protecting data are complex and time-consuming for IT.

The right devices and accessories can help IT and business leaders

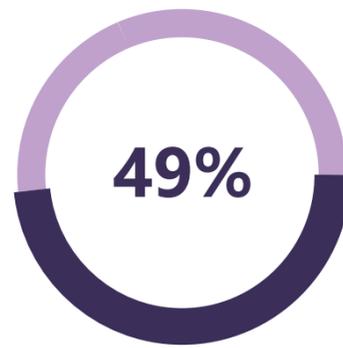

Empower teams with tools for productivity.

>70% of organizations surveyed say significant to moderate improvements to PC quality are needed to support hybrid work.¹

Ensure employees are engaged.

88% of survey respondents indicated Microsoft 365-powered Surface devices helped employees become more collaborative.²

Keep data protected and secure.

49% of those surveyed with Surface devices reported reduced security incidents.²

Choose devices that optimize hybrid work
Your teams require different tools to be successful:

Many prefer flexible 2-in-1 devices, while some love their laptops.

Everyone wants accessories that work seamlessly and make work easier.

Simplify security with zero-touch deployment and password-free login.

Set your employees up for success with devices and accessories that enhance productivity, collaboration, and security.
